- **1897** - Founding of El Siglo factory in Onda, Spain
- **1950s** - First collections arrive in the U.S.
- **1996** - ADEX USA opens headquarters in Miami
- **2005** - Expansion to California
- **2017** - Third distribution center in New Jersey

● OVER 125 YEARS OF HERITAGE. A LEGACY OF DESIGN, CRAFTSMANSHIP AND FAMILY.

At ADEX USA, our story began in 1897 in Onda, Castellón (Spain), where our first ceramic factory, El Siglo, was established — a building that still stands today as a symbol of our origins. What started as a family business dedicated to the art of

tile making has grown into a legacy carried forward by five generations, blending European craftsmanship with a deep commitment to the North American design community.

In the 1950s, we introduced **our first collections to the United States**, including a unique series of artisan tiles created in collaboration with Spanish artist Salvador Dalí. This marked the beginning of a long-standing relationship with the American market that continues to define who we are today.

To better serve our customers, we established our U.S. headquarters and distribution center in **Miami in 1996**, later in **2005** expanding to the West Coast with a facility in **California**, and opening our third distribution center in **New Jersey in 2017**. This national presence allows us to provide personalized service and efficient support to our network of trusted dealers and design professionals across the country.

Throughout our history, ADEX has remained true to its values: preserving the artistry of handcrafted tiles, offering refined and distinctive collections, and honoring the timeless appeal of small formats, intricate reliefs, and curated glazes. **Each piece reflects the balance between design tradition and modern innovation**, bringing dimension, unity, and harmony to both residential and commercial spaces.

Today, as a family-owned company guided by the fourth generation and preparing the way for the fifth, we continue to create new classics for the North American market, with the same passion for design, attention to detail, and personal commitment that have defined us for more than a century.

SUSTAINABILITY

At ADEX USA, sustainability is embedded in the way we design and manufacture ceramic. Our approach considers the entire life cycle of each product, from raw materials to manufacturing, use, and end of life, ensuring environmental responsibility without compromising performance, durability or design.

CERTIFICATIONS

- ISO 14001 certified Environmental Management System
- Independently verified Environmental Product Declaration (EPD)
- Certified under the GlobalEPD program by AENOR
- Developed in accordance with UNE-EN ISO 14025, EN 15804 + A2, and EN 17160
- Third-party verified environmental data covering the full product life cycle

RECYCLED CONTENT

- Up to 45% recycled content in wall tiles
- Up to 47% recycled content in floor porcelain tiles
- Up to 58% recycled content in mosaics
- Recycled content certified according to ISO 14021

DURABILITY AND RECYCLABILITY

- Minimum service life of 50 years
- Designed for durability and reduced replacement
- Up to 70% recyclable or reusable at end of life
- Supports long-term circular economy objectives

RESOURCE EFFICIENCY

- Approximately 30 to 32% of annual electricity generated through solar power
- Up to 38% during peak sunlight hours
- Continuous reduction of energy and water consumption across production processes

SAFE & RESPONSIBLE MATERIALS

- Non-toxic and chemically inert ceramic products
- Free from substances of very high concern (SVHC below 0.1%)
- Lead and cadmium eliminated from formulations
- Full compliance with strict European regulations

CONTEMPLATE THE JOYS OF VIRTUALLY
UNLIMITED DESIGN POSSIBILITIES

Designed and Built By: Dave Fox Design Build Remodelers

NERI

SOLID GLAZE

The Neri Collection will inspire you with its classic neutrals: White and Lino in addition to a dramatic Black. Each can be used alone or in endless combinations. You can combine this exquisitely versatile backdrop with virtually any color or texture to complement or contrast. The variety of sizes, finishes, shapes and trims will provide that personal touch we all desire.

COMBINE THE MASTER POTTER’S CRAFT OF THE HANDMADE SURFACE WITH A DEFINED, SOPHISTICATED EDGE

STUDIO

TRANSLUCENT GLAZE

The innovative Studio Collection offers depth and character for understated movement and variation. The ensemble includes highly embossed decos, artfully painted surfaces, and three-dimensional trims – all presented in a sophisticated and harmonious color palette. You can personalize bathrooms, backsplashes, accent walls, and more for a lasting impression.

EXPRESSIONS IN ART

The ultimate expression of one's self throughout human history has been in the form of Art. Art has told the story of our cultures, our events, and our feelings throughout time.

The hand-painted tiles in our Studio Collection are a medium to convey our personalities and appreciation of the Arts into our living and working environments. We offer you the use of a simple accent strip or the option of fully tiled rooms with these beautiful, yet classic designs. The colorways of these designs were created in the color palette of the Studio Collection. You can also create a unique accent of framed Art by utilizing Studio Collection moldings and corners.

Be creative and free to express yourself.

SERENE BEAUTY INSPIRED BY NATURE’S EMBRACE

HABITAT

MULTI TONE GLAZE

Beautiful surroundings can evoke feelings of comfort, joy and peace. Invite these sentiments to any interior space with the Habitat Collection. Deep glossy glazes and soft matte finishes are available in an elegant tone on-tone color palette. A full complement of field tile sizes, trim and moldings are available to suit traditional, transitional and contemporary designs.

IMMERSE YOURSELF IN THE ELEMENTS
OF THE MEDITERRANEAN

LEVANTE

MULTI TONE GLAZE

Levante is inspired by the distinct provincial winds that blow in from the Mediterranean Sea through Valencia and the entire Southern Coast of Spain. The flowing texture of Levante embody nature's beauty and mystery.

Discover Levante's sophisticated offerings, including the delicate white hue of Aire, captivating glossy finishes, refined matte finishes, and hand-painted elements. These tiles embody the essence of timeless beauty, showcasing the artistry and craftsmanship synonymous with ADEX.

THESE AUTHENTICALLY HAND-PAINTED CERAMIC TILES FEATURE GENTLE BRUSH STROKES OF INVITING COLORS THAT WORK BEAUTIFULLY TOGETHER.

The Levante Collection presents 10 unique Decos, skillfully combining standout features that not only complement but also elevate the distinctiveness of any design.

At ADEX USA, we take immense pride in crafting these extraordinary treasures. Each tile is a testament to the care and dedication as they are meticulously painted one by one by our skilled painters. Infused with our unwavering passion and expertise, our hand-painted tiles showcase unrivaled artistry and meticulous attention to detail, a tradition rooted in our heritage since 1897.

A GENTLE SPRING BREEZE BRINGS LIFE TO A CHILD'S WINDMILL AND CREATES A SUBTLE, CALMING MOVEMENT IN NATURE.

Like the pattern from a windmill, the Levante Compass Decos create visual variations in space, inviting countless abstract references.

Crafted with a glossy finish and available in the same range of colors as the Levante Collection, these hand painted tiles serve as a canvas for your imagination, offering endless design possibilities. With Levante Compass Decos tiles, your space becomes a playground of creativity. Channel the winds of inspiration and enjoy the elegance of hand-painted tiles that capture the essence of artistry and innovation.

COASTAL BEAUTY AND MICRO CRACKLE ELEGANCE
COME TOGETHER IN PERFECT HARMONY IN THE
OCEAN COLLECTION

OCEAN

MICRO CRACKLE

When looking into the ocean on a calm day, you feel a sense of serenity and a depth of vision. Relaxation, reflection and visual stimulation are inherent to the Ocean Collection.

When the surface effects of a typical crackled glaze combine with the unique micro-crackle effect, its reflective, yet dimensional surface makes the tile not only unique, but transitional in design from classic to contemporary. The decorative components and finishing pieces of the Ocean Collection color palette make it the choice of designers and homeowners globally. Enjoy your day at the beach every time you enter the room.

BEAUTIFULLY CRAFTED WHERE EACH TILE TELLS A MESMERIZING STORY OF ARTISTRY AND TIMELESS ELEGANCE

HAMPTON

CLASSIC CRACKLE

White

Bone

Cadet Gray

Stellar Blue

The magic in the finely crafted Hampton Collection tiles begins with the crackle-glazed surface, which appears aged to perfection. The crackle effect gives each tile a delicate character and an individual mystique. With the Hampton Collection's versatility, you can tell a story in a wide range of decors, from traditional to transitional to minimalist.

LET TIMELESS BEAUTY INSPIRE YOUR DESIGNS WITH
THE ADEX MOSAIC COLLECTION

MOSAIC

GLAZED PORCELAIN
MOSAICS

This soothing color palette of glossy & matte porcelain tiles is a timeless complement for any wall tile application. These soft colors with subtle color variation within each tile offer many tone-on-tone design possibilities to be paired with porcelain wall tiles, ceramic wall tiles and natural stone. Mosaics are a true classic that provide just the right pop in traditional, transitional and modern design applications.

MARBLE & STONE

COLOR PAIRING GUIDE

Marble and Stone surfaces define the elegance and character of any space—be it kitchens, bathrooms, or living areas. Achieving a cohesive and balanced design requires pairing these materials with ceramic tiles that enhance their natural beauty.

This section is your expert guide to discovering the ideal Adex ceramic tile combinations for popular marble and stone surfaces. Our carefully curated recommendations simplify the selection process, ensuring stunning results that elevate every project.

Browse our curated list of the most popular stone and marble color surfaces and discover ceramic tiles thoughtfully selected to complement their unique beauty, ensuring harmonious and stunning designs.

INSTALLATION GUIDE

CERAMIC TILES

Industry Standards

All ADEX tiles are to be installed using the prevailing guidelines as set forth in the TCNA (Tile Council of North America) Handbook and the ANSI (American National Standards Institute) specifications. Installation should be carried out by experienced personnel. The TCNA and ANSI A108 standards can be purchased at www.tcnatile.com

Tile Layout and Design confirmation

We strongly recommend dry laying prior to installation. Blending the ceramic tile glaze and laying out trim and decorative accent pieces is key to insuring a pleasing overall look. This will resolve potential color or size issues prior to installation and will serve as a validation of tile placement. The owner or owner’s representative is responsible for evaluating and approving the material prior to installation. Installation constitutes acceptance. ADEX USA assumes no responsibility for installation.

Substrate Preparation

The surface where the product is going to be installed must be clean and level. When preparing the substrate, the maximum allowable variation should be no more than 1/8” in 10 feet from the required plane from the high points in the substrate. Deviations in the framing of substrate should be corrected before installing the substrate. Do not use setting material to build up or level the substrate. This could cause stress on the tile and lead to cracking.

Mortar Thickness

An even setting bed of mortar no greater than 1/4”; best achieved by using a ¾” notch trowel.

Back buttering ceramic tiles

ADEX does not recommend this practice due to the varying and potential imprecise thickness that can be applied. ADEX fabricates various decorative pieces, and some have hollow areas and reliefs. Adhesive should not be used to fill gaps or hollow areas.

Soaking tiles prior to installation

ADEX does not recommend this practice.

Expansion Joints

Strict adherence to the TCNA EJ171 guideline is mandatory. This standard defines mandatory movement joints as well as recommended sealants.

SETTING MATERIALS

ADEX recommends high-performance setting materials that meet ISO 13007 Standards: Product Classifications C2, F, and S1. Please see the example below.

CUSTOM BUILDING PRODUCTS ProLite, ProLite RS, or a similar-grade adhesive from another reputable manufacturer with comparable technical performance.

For mud installations, all setting materials and installation methods should follow the current guidelines in the TCNA (Tile Council of North America) Handbook and ANSI (American National Standards Institute) specifications. Use an even mortar bed no thicker than 1/4”, ideally applied with a 1/4” notched trowel.

GROUT

UNSANDED grout is typically used for 1/8” grout joints or smaller.

SANDED grout is recommended for grout joints larger than 1/8", as long as the excess material is removed with a damp sponge. Using notched trowels or grout floats may scratch the tile. Special care should be exercised with high sheen surfaces to prevent scratching.

Grout Joint Accuracy: Spacers should be used for even grout joints.

WE DO NOT RECOMMEND CONTRASTING COLOR GROUTS ON OUR CRACKLED GLAZED TILES.

SATIN FINISH: For Satin Finish tiles, due to the nature of some of the dark grout pigments, it is recommended to avoid dark color or contrasting color grout, to prevent potential staining and grout haze.

DIMENSIONAL PIECES: The surfaces of raised/dimensional decorative accents, borders or liners can be taped during grouting to facilitate cleanup.

METHOD

Follow the appropriate standard ceramic procedures provided by the TCNA (Tile Council of North America) Handbook and the ANSI (American National Standards Institute) specifications.

CRACK ISOLATION / WATERPROOFING MEMBRANE

Unless required by the applicable TCNA method (example steam showers), a membrane is not needed for ADEX tile installation. If installing over a liquid-applied membrane, sheet membrane, or waterproof tile backerboard, use rapid-set thin-set or epoxy adhesive. Always correct framing/substrate deviations before installing the backerboard or membrane and follow the manufacturer's instructions.

SEALING

Solid Glazes: Sealing is not required for Solid Glazes.

Crackle Glazes: The effect of crackle glaze on ceramic tiles occurs when the glaze and the body of the tile undergo differential shrinkage and cooling during the manufacturing process. This leads to the formation of delicate micro-fractures within the glaze.

Sealing is mandatory for crackle glaze. We recommend a solvent-based penetrating sealer before and after grouting. Sealing tiles should be performed by an experienced tile contractor.

- The sealer penetrates the fine, hairline fissures in the glaze and prevents the crackle from darkening over time.

- Sealing the crackled glaze makes it easier to maintain and clean.
- Proper application of the sealer (wipe off any excess from glazed surface) will not harm or change the appearance of the tile.

METHOD AND RECOMMENDED SEALER – STEP BY STEP

1. **Pre-Grout Clean:** Mount tiles to the wall. Ensure the surface is free of dirt, dust, and debris.
2. **Initial Seal:** Apply an even coat of solvent based sealer. ADEX recommends *FILA MP90 Natural Look Penetrating Sealer* using a paintbrush or lambswool applicator pad.
3. **Cure:** Wait 24 hours for the initial coat of sealer to cure completely.
4. **Grout Application:** Apply grout using a clean sponge, distributing it evenly over the joints. Do not use a grout float.
5. **Post-Grout Clean:** Once the grout is dry, clean the surface using *FILA Cleaner (Neutral Cleaner)* diluted at a 1:30 ratio. Scrub with a cloth and scrubbing brush, remove residue, and rinse thoroughly.
6. **Secondary Seal:** Reapply an even coat of *FILA MP90* with a paintbrush or lambswool pad.
7. **Excess Removal:** Wait 15 minutes for the sealer to set, then wipe away any excess from the glazed surface to ensure accurate material absorption.
8. **Final Cure:** Allow 24 hours for the product to cure completely before exposing the area to moisture.
9. **Alternative Brands:** If using a non-FILA solvent based sealer, verify compatibility with the alternative sealer manufacturers
10. **Re-Sealing:** Reapply to grout joints and crackle glazes periodically as needed. When water no longer beads on the surface of the joints, resealing is required.

MAINTENANCE

Clean the tiles regularly with a nonabrasive/non-acidic, mild and PH neutral cleaner.

We recommend *FILA CLEANER – Neutral Cleaner* (Available in our Price List) for all cleaning purposes of our tile. Sealer: Reapply to grout joints and crackle glazes periodically as needed. When water no longer beads on the surface of the joints, resealing is required.

GLAZED PORCELAIN TILES

Install with any high-quality adhesive recommended for porcelain tiles. This must also be suitable for the environment they will have to withstand. Fitting with traditional mortars does not ensure good adhesion.

For Mud Installations, all setting materials and installation methods should be performed using the prevailing guidelines set by the TCNA (Tile Council of North America) Handbook and the ANSI (American National Standards Institute) Specifications.

GROUT

For Porcelain tiles, we recommend using a minimum of 5/64-inch (0.08" or 2mm) spacers for a perfect alignment of the tiles. It will also be necessary to make small adjustments by hand to compensate for the natural dimensional variations of the tiles. The joints should be filled in with appropriate materials according to the specifications given by the grout manufacturer. We do not recommend the installation of porcelain tiles without grout joints.

METHOD

Follow the appropriate standard ceramic, porcelain and glass tile installation procedures provided by the TCNA (Tile Council of North America) Handbook and the ANSI (American National Standards Institute) specifications.

MAINTENANCE

Clean the tile regularly with a non-abrasive/non-acidic, mild and PH neutral cleaner.

We recommend *FILA CLEANER – Neutral Cleaner* (Available in our Price List) for all cleaning purposes of our tile.

Use products which are suitable to eliminate the remains of mortar, cement, etc. Never use an acidic cleaning agent on newly installed flooring as the acid reacts with the unset cement and can damage the seals, or insoluble compounds can be deposited on the surface of the paving.

Do not use metal scrapers or abrasive pads.

Daily cleaning, after use, only requires clean water and a well-wrung cloth. In areas where the tile could be especially messy (kitchens), a detergent with, vinegar, bleach or ammonia can be added to water, although in this case a final rinse with clear water is recommended. Do not use waxes, oils or similar products. In cases of very dry and specific stains, which cannot be removed with a damp cloth, apply concentrated bleach (the one for floors, not the one used for clothes) and leave it to dry. You may need to repeat this process for

especially resistant stains.

For floor surfaces; water, grease, oil, etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection and maintenance.

PLEASE NOTE

Due to the nature of our tile, a certain amount of variation in color, shading, surface and texture are to be expected.

Use of the tile constitutes acceptance. We assume no responsibility for installation.

The installation information provided is to be used as a guideline only and should be discussed with an accredited professional tile installer.

INSTALLATION	
GROUT JOINT RECOMMENDATION	SHADE VARIATION
1/8"	V1 - Uniform Appearance

CLEANING RECOMMENDATIONS
Routine with a non-abrasive/non-acidic, mild and PH neutral cleaner

CHARACTERISTICS	
Glaze	Solid
Surface Sheen	Glossy and Satin
Texture	Smooth

*Thickness is understood as the highest point of the tile.
Due to the nature of our tile, a certain amount of variation in color, shading, surface and texture are to be expected.
Satin Finish: Due to the nature of some dark grout pigments, it is recommended to avoid dark color or contrasting color grout to prevent potential staining and grout haze.

INSTALLATION	
GROUT JOINT RECOMMENDATION	SHADE VARIATION
1/8"	V3 - Moderate Variation
For Habitat Glossy tiles, please refer to our INSTALLATION & MAINTENANCE guidelines.	

CLEANING RECOMMENDATIONS
Routine with a non-abrasive/non-acidic, mild and PH neutral cleaner

CHARACTERISTICS	
Glaze	Solid with subtle movement and high color variation
Surface Sheen	Glossy and Matte
Texture	Slightly Undulated

*Thickness is understood as the highest point of the tile.
Due to the nature of our tile, a certain amount of variation in color, shading, surface and texture are to be expected. This collection is characterized by its shade variation. Some colors in the series have more variation than others. Expect shade variation between the individual field tiles and between field and trim within each color. Due to the shape of the pieces and the nature of production, this is especially true for variation between field and trims. Trim pieces like quarter rounds, finishing edges and other moldings may have more glaze pooling and different pooling effects than other pieces. Expect variation within each run, and from production to production. IT IS IMPORTANT TO BLEND TILE WITHIN EACH CARTON AND FROM MULTIPLE CARTONS DURING INSTALLATION. This is best achieved by laying out the material prior to installation.
